Optional Custom Powder Coating

Due to the printing process, colors may vary. Please ask to see color samples. Not all colors available on all models.

Garage doors are available in these four panel styles.

Raised

Flush

Bead

Groove

INTERFORCE®

STRUCTURAL REINFORCEMENT SYSTEM

Superior Strength Without Excessive Weight

What makes a Hurricane Master® Garage Door Stronger?

While all other garage door manufacturers were scrambling to come up with ways to meet the tough post-1992 Hurricane Andrew building code requirements, DAB designed, engineered, patented and produced the InterForce® Structural Reinforcement System, a revolutionary reinforcement system that fortifies our garage doors at the critical points where the panel sections are joined and wind loads are transferred to the hinges, rollers and track. Every Hurricane Master® garage door contains our InterForce® system, which exceeds the post-1992 building code requirements. Plus, because of the InterForce® system, Hurricane Master® garage door panels will not sag like other manufacturers' panels that have been reinforced with heavy materials. The strong yet lightweight InterForce® system is far superior to the bulky and heavy reinforcement systems other manufacturers add to their doors to meet code requirements. Don't settle for less and don't settle for an inferior garage door that may get blown in during a strong windstorm! DAB's exclusive InterForce® Structural Reinforcement System provides proven strength, dependability and protection in the absolute worst conditions.

IT'S WHAT'S INSIDE THAT COUNTS!®

Miami-Dade Approved Impact Windows

On this page you will find different design options for our HVHZ impact windows. Like all of our products, the windows have been large- and small-missile impact tested and have been approved for both Miami-Dade and Florida building codes. If you don't see a design that you'd like, please contact us as many other custom window design options are available. Our creative experts will work with you to convert your ideas to perfect reality. Please call for an appointment for one of our consultants to come to your home, or stop by our showroom. We'd love to say hello and prepare a customized proposal just for you.

Decorative Window Insert Series

Window inserts are available in clear or frosted. There are many pattern options to choose from. Please ask about other options.

HURRICANE MASTER by DAB **GARAGE DOORS®**

World's Strongest Garage Doors!

Florida-Born Protection

DAB Garage Door Systems was founded in 1998 in Dade County, Florida and we still manufacture our products there today. DAB Door is a second generation family company that is Florida-born and understands the dangers that hurricane-strength winds pose to Florida's homeowners. We also understand that hurricanes will happen, which is why we over-engineer our garage doors to be the **STRONGEST AND MOST IMPACT-RESISTANT DOORS EVER BUILT BY ANY COMPANY, ANYWHERE.**

Getting hit by a hurricane in Florida is not a question of 'if', it's a question of 'when'. So, if your home is located within 150 miles of the Atlantic Ocean or the

Gulf of Mexico, a DAB Hurricane Master® garage door is the superior choice to help ensure the safety of your family and property.

Our doors high load and low load pressures not only meet the requirements of Miami-Dade County, they exceed them! We also offer a variety of track options (high lift, vertical lift, standard lift, and low headroom).

But superior strength is just the beginning, our garage doors are also beautiful and thereby add value to your home.

Strength and Beauty

From the outside they look like beautiful garage doors, but they're so much more. DAB's Hurricane Master garage doors are built to look great AND take on Mother Nature's worst. In fact, **STRENGTH** is built in to every component of every garage door we manufacture so you don't have to compromise protection and dependability for an attractive home. Ask your DAB customer service representative to show you all the models and styles we have to offer. Add strength and beauty to your home, today.

OUR DOORS ARE HIGHLY CUSTOMIZABLE, ASK US!

The best choice for Residential garage doors.

Our garage doors are designed specifically with hurricane protection in mind. We have been issued eight patents for our doors, which achieve the highest design loads of any doors available. This is done without mounting large reinforcement on the back of the doors, and helps with clearance to park larger vehicles inside garages. Our door is designed to maximize the space in your garage. We use smaller U-bars and less of them, while still maintaining the strength of the door.

GARAGE OPENING	DOOR WIDTHS	DESIGN LOAD RANGE*	TEST LOAD RANGE	DRAWING #
Single-Car Garage	4'0" to 9'4"	+50/-60 psf +62/-70 psf	+75/-90 psf +93/-105 psf	01-09 01-05
Double-Car Garage	9'6" to 16'2"	+27/-30 psf +36/-44 psf +48/-52 psf +56/-64 psf	+40.5/-45 psf +54/-66 psf +72/-96 psf +84/-96 psf	03-06 02-21 98-05 00-18
2 1/2 Car Garage	16'4" to 18'2"	+40/-44 psf +55/-64 psf	+60/-66 psf +82.5/-96 psf	05-03 99-24

Maximum Design Pressures

Each door section incorporates a built-in wind load resistance system to withstand the intense effects of wind velocities from 90 MPH to over 200 MPH for the broadest wind load coverage available.

*Wind load requirements for each door can differ from one site to another due to such things as door size, the door's location on the structure, and localized wind zones, among other factors. For this reason, it is recommended for a local garage door professional, architect, or engineer to assess the necessary wind pressures for the given door opening.

Excellence In Customer Service

Our #1 Priority Is Your 100% Satisfaction.

That means our customer service representatives and installers work for YOU and will do everything within their power to satisfy your needs. This is not a statement that was written just to sound good, it is the philosophy upon which our business was built. If for any reason you are not satisfied, please call DAB and ask to speak with a manager. We WILL resolve any issue you may have. All doors are patent protected.

Added Value and Confidence

Our commitment to product excellence is clear-cut. Our products will have no material defects or defective craftsmanship or DAB will resolve

the problem. Our door systems are engineered to better resist the forces of nature. That's why DAB can offer its door systems with a timeless, Transferable Limited Master Warranty™ that passes from one homeowner to the next as long as the door remains installed on the property. Extending the manufacturer's warranty coverage to successive property owners distinguishes a home in a competitive market by providing each new owner an extra measure of quality assurance. For additional details on our warranty coverage, please refer to the product's written warranty or consult with your DAB authorized dealer.
